📘 Complete HTML and CSS Notebook with Exercises and Real Projects (English Version)

This notebook is for learning and quickly reviewing important HTML and CSS tags and styles. It includes practical exercises and real projects.

Chapters 1 to 11: Exercises

(All exercises are like before, now in English)

Chapter 12: Real Projects

Project 1: Personal Profile Page

    • Create an HTML page that includes:
    • Profile picture
    • Name and short information
    • About me section
    • Links to social media
    • Use CSS to style cards and colors

Project 2: Simple Online Store

    • Include header, main, and footer
    • Add several products with picture, name, and price
    • Use Grid or Flex to arrange the layout
    • Add a buy button for each product

Project 3: Responsive Login and Signup Page

    • Login form with username and password
    • Signup form with name, email, and password
    • Forms must display correctly on mobile
    • Use CSS for style and Flex/Grid for layout

Project 4: Photo Gallery with Grid

    • Create a container with several pictures
    • Arrange pictures in columns
    • Click on a picture to see it bigger (simple lightbox)

Project 5: Professional Navbar and Footer

• Navbar with several links
• Change Navbar layout on mobile
• Footer includes contact info and social media links
• Use Flex and CSS for attractive style

Important Tips for Projects:

1. Always use classes for styling.
2. Put CSS in a separate file.
3. Use Flex and Grid for layout.
4. Make pages responsive.
5. Practice to build projects independently.
